USING AI

As a Tool Not a Weapon

I never got why anyone would ever feel the need to automate something like art, but I didn't want to be close minded, and I tried my best to justify its existence... so far? I'm not impressed. It's being used to harass artists, make fun of them, and people feed their AI with artists' works without permission, sometimes targeting a specific artist as well.

Here's the product:

Thankfully, there has been a change recently, as many people have been carrying out lawsuits and suing those who are profiting off of it, and companies have been placing policies around it.

(15 second speed-paint of the drawing QR code)

I thought, how could I use AI art to my advantage? So, I tried to generate an AI drawing to use as reference for a drawing. However, it was very difficult to get a desired image, but I was happy with my own results.

A BLAST

Maria Khabbازه

From the Past Ancient Punishment

The ancient world truly had some cruel and evil ways of punishing those who dared to break the barbaric rules that were set.

HERE ARE SOME OF THE WORST PUNISHMENTS OF ANCIENT HISTORY.

1. Hanged, drawn, and quartered

Decided to break the rules of the superior beings in 1352? Well that just might be the last thing you do. If you were found guilty of treason, you were tied to a horse and dragged several miles to the gallows. You then were hanged (not to death), disemboweled alive, then tied by each of your four limbs to four horses which would begin to walk in different directions, ripping you apart.

2. Rat Torture

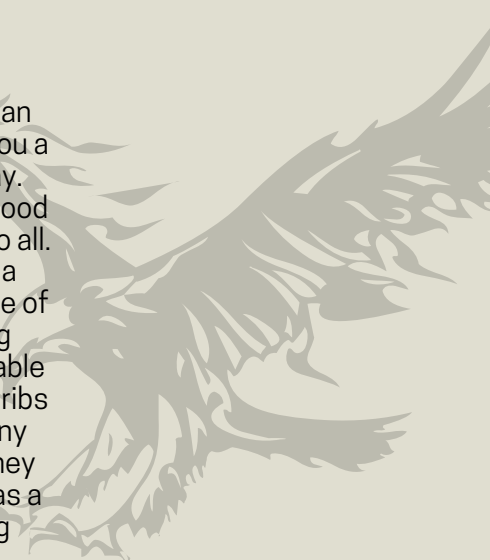

Rats nibbling through your skin, into your organs, and out the other side of your body, rat torture was NOT for the lighthearted. The prisoner is first tied to a table or chair. Once you have been strapped in, rats in cage were then placed and tied to your body. Once assuring that the rats cannot escape, a fire was then hovered over the cage to provoke the rats, eventually leading to worry among the rats, forcing them to escape by eating you alive.

3. Blood Eagle

Have you ever imagined what it was like to be an eagle? Well, this death penalty certainly gave you a close resemblance to one, but, in a bloody way. Back when the Vikings roamed the world, the blood eagle execution was a famous entertainment to all.

The victim was tied to a flat surface (usually a table), and had their shirt removed. Then, a blade of some sort was used to make a deep and long incision on the victim's back, eventually being able to see their ribs. They then would separate the ribs from the spine, pulling all the bones out and any skin outward, creating some sort of 'wings'. They then were hung on display for all those to see as a warning sign to their enemies, and any willing traitor.

WHAT DO **YOU** THINK ABOUT THESE **PUNISHMENTS?** IMAGINE **YOU** WERE IN THIS SITUATION, HOW WOULD **YOU** REACT? **HAVE A SPOOKY DAY!**

THE QUEEN'S GAMBIT

Your GO TO Chess Guide

Context

With the rising popularity of chess in the beginning of 2023 through social media, largely due to youtube and twitch videos of famous online chess players such as Hikaru Nakamura and Levy Rozman (GothamChess), Antonine College has begun to see an increase in popularity with the popular board game. This article is to fuel your curiosity for chess and perhaps encourage you to play. The Antonine Zine Chess Tutorial will go over the very basics of chess, which will be the way to properly move the pieces and terms that are mentioned in a professional game of chess.

GMHikaru (Hikaru Nakamura)

- Youtuber and Grand Master (GM)
- Key twitch streamer for chess
- Number one Rated Blitz Player in the world

"I don't know
what's going on
I'm just gonna
castle I
don't wanna
think too much."

MagnusCarlsen

(Sven Magnus Øen Carlsen)

- Five Time Chess World Champion
- Twitch Streamer for Chess
- Youngest Player to be no.1 at 19 years old

"Lets try this
one, how do
knights move?"

GothamChess (Levy Rozman)

- Youtuber and International Master (IM)
- Chess Twitch Streamer of the Year
- Makes chess accessible for beginners on his videos

"We're gonna live
we're gonna laugh,
we're gonna love
we're gonna cry,
mostly cry because
it's chess."

Objective of a Chess Game

You Can Win a game of chess If:

- You checkmate the enemy king (the king can not move)
- Opponents time reaches 0 seconds before you (winning on time)
- If the opponent resigns

Image(s) courtesy of chess.com

In this image taken, if the queen takes the pawn that is diagonal to her, she will be able to checkmate the king. The king will not be able to move without being eliminated and no other piece will be able to save the king. The match is over and white wins.

How the Pieces Move

Pawn

- Moves straight forward
- can take a piece that is diagonally in front of them.
- May move 1 or 2 squares forward as the opening move.
- Each Pawn is worth 1 point.
- 8 pawns occupy the front of your side

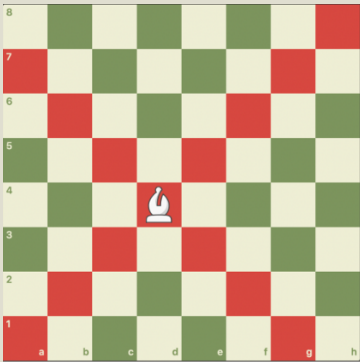

Rook

- The piece that at looks like a castle tower.
- It is placed on either side on the bottom corner, can move straight in any direction.
- Worth 5 points.
- Has the ability to 'castle' the king

The Knight

- Adjacent to the rook at the start
- May move in an L shape
- May be moved 2 spaces straight and 1 square in any direction adjacent to it.
- Only piece able to jump over other pieces.
- Worth 3 points.

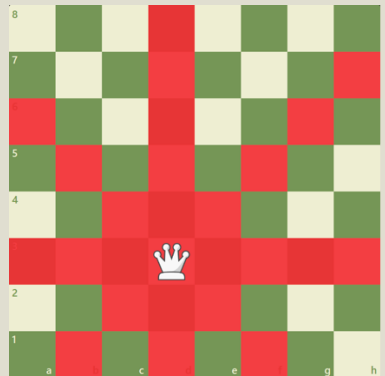

The Bishop

- May move diagonally in any direction.
- This piece may also take any piece that is in its range.
- This piece is worth 3 points.

The Queen

- May move in any direction
- This poses as the biggest threat to enemy pieces and is worth 9 points.

The King

- Arguably the most important piece.
- Weakened version of the queen.
- May move one square in any direction
- Trapping the king means checkmate

Chess Moves:

Castling

- Move your king and rook in order to retreat your king to safety

As shown in the image, you may castle long way (queens side) or short way (kings side).

The following criteria must be met before castling:

- Your king and rook have not moved during the game
- The space between the king and rook is empty

Checks

- Checks are a type of move that attacks the king and must be defended.

The check may be stopped by:

- Defending the king with another piece to prohibit piece movement
- Taking the attacking piece with king is possible
- Taking attacking with another piece
- King runs away

En passant (Pronounced Ahn Pasant)

- Rare move in Chess
- Pawn goes diagonal to take opposing pawn.
- Only allowed if the opposing pawn has moved 2 squares as opening move.

Forks

- Forks are moves which threaten multiple pieces, making decisions on what piece to defend more difficult
- Commonly done with Knights but is possible with other pieces
- Fork may be averted if forking piece is taken
- If one piece is saved, another may be taken as shown in the image

KFC From Home

Here is how to make your own zinger burger at home (recipe makes 2 burgers):

Ingredients:

- 1kg Chicken breast fillets
- Herbs and spices (Listed in recipe steps)
- Lettuce
- Mayo
- Buttermilk
- Flour
- Burger Buns

Step 1: Combine the following herbs & spices into a bowl of two cups of flour and also into a separate butter milk mix:

- 1 Tsp Salt
- 2 Tsp Paprika
- 1 Tsp Chilli Powder
- 1 Tsp Garlic Powder
- 1/2 Tsp Onion Powder
- 1/2 Tsp Mustard Powder
- 1/2 Tsp Ginger Powder
- 1 Tsp Black Pepper
- 1 Tsp Thyme
- 1 Tsp Dried Parsley
- 1 Tsp White Pepper
- 1 Tbs Hot Chilli Sauce (Into the butter milk only)

Step 2: Place 1kg of chicken breast fillets into the buttermilk mixture, then the flour mixture, and repeat once more (double battered the chicken)

Step 3: Fry until golden brown.

Step 4: Place your chicken, lettuce and mayo on the burger bun and enjoy.
